

## ePad Demo M2 Prototype Walk Through

Actions	Messages
Show Main UI	New Design
Main Button Bar	
Fwd/Back Buttons	
Start Page	Talk about system data and personal data sections
Open Earth to Moon	
Talk about table of contents	Talk about new design, backgrounds, etc
Click on Chapter 20 – Attack and Riposte	Point out page edges reflect position in book
Page forward	
Show Riffing	
Show Ink	Talk about new pen control, how it toggles
Show Highlighting	
Show Erase	
Change to Selection by holding Pen Menu	Talk about context menus
Show Bookmarking	Show how bookmarking moves from side to side
Show Page Number (hold)	
Go to next chapter	Say the words President and Affair remind you of something you read in Slate
Tap on Start Button – Show start page	
Open Slate Magazine	
Show Explainer Chapter	Say that you would like to compare this page to last book.
Click and hold on a page	Talk about context menu, explain how it is context sensitive.
Pin Page	
Click History twice to go back to “Earth to Moon”	Point out the Icon, and text associated with the History button
Turn a page in Earth to Moon	Show how Earth to Moon is still “in focus”
Make Slate the book	Say you want to look at the next page in slate.
Turn Page in Slate	
Pin Slate Again	Explain how “Earth to the Moon” returns because you re-pinned the book.
Close Pinned Slate Page	
Make 2 Notes on Earth to Moon	Talk about taking a note in place.
Click and hold Start Button to get Context Menu	Talk about how context menus are shortcuts to common commands. Here we are using them to avoid returning to the Start Page.
Choose Messages	
Read Email	
Show System Pinned Directory	Talk about how the system can suggest that a directory be pinned by default, but the user can override.
Click a few messages in the pinned page	Show how pinned directory navigates book.
Read a message till end	Talk about how email is just a book.
Show Email end page	Talk about how the system/application generated the list of available commands by suggesting both common sort related navigation’s, and heuristically generated possible next navigation’s.
Click first message again	
Close Pinned Directory	Explain that the pinned directory is just another page and is not required for email functionality.
Page ahead one message	Talk about how email is treated just like a book.
Write another note	Prove it by making another note.
Show Notes Page	Talk about how we made a note before but we don’t want to have to remember where we put it.
Show thumbnail view	Talk about how view can change and that this is future work. Also explain that notes are just documents and can be opened like a book as well.
Close Note	
Hold on History	Talk about how history presents a pop view as well. Mention we are experimenting with several different strategies for history. We have linear, Branching, and Filtered models.
Choose Mail Message Number 1	
Point out Commands at top of email	Talk about how the really most important commands might be imbedded right in the content.
Click and Hold and talk about context menus	Talk about how the next level of commands are available with a hold.
Click the Quick Sheet button	Say that this is currently just a bit map, but shows the direction that we want to head in the future
